

Grisha Kostyuk, experienced python developer

grisha aka naspeh, pythonista | modified at 06.10.2020 | [show source](#) | [look at github](#)

naspeh[at]gmail.com // Yaremche, Ukraine // remote only

I'm a passionate python developer with over a decade of experience in web development. I'm especially strong in back-end development, good in automation and deployment (including CI/CD), occasionally I can do modern front-end.

I love simplicity. I usually choose fewer abstractions to be closer to the lower layer.

In my spare time, I enjoy pursuing perfection on my open source projects:

- [Mailur](#) – a lightweight webmail inspired by Gmail
- [Timefor](#) – a command-line time tracker (my first dive into go-lang)
- more projects on [github page](#).

Python developer since October 2009

05.2019 – 05.2020 [15five.com](#) (continuous performance management platform, remote)

django developer; participated in the development of few big features (third-party integrations); was responsible for demo accounts; helped to improve CI and development workflows; helped to introduce [isort](#) and [black](#).

04.2018 – 11.2018 [datarobot.com](#) (automated machine learning platform, remote)

python developer; focused on tools that improve developer workflow; was working on different integrations for Slack, Github, and Jenkins; optimized parallel execution of functional tests over Jenkins slaves.

09.2016 – 10.2017 [sourcefabric.org](#) (open source tools for journalism, remote)

python developer and DevOps; was working on [Superdesk](#); quickly became responsible for testing instances;

developed from scratch [Fireq](#):

- uses [LXC](#) containers as we used them in production
- for continuous deployment of testing instances for branches and Pull Requests
- for continuous integration as well to get a better time for E2E tests
- and for other automation of Superdesk related projects.

Other Employment History

11.2015 – 06.2016 [scribesense.com](#) (remote); postgres and python developer;

08.2014 – 08.2015 [likealocalguide.com](#) (remote); python developer.
